

REMARKS

This application is a continuation of USSN 10/325,364 filed December 19, 2002, which is a divisional of USSN 09/364,242, filed July 29, 1999, now U.S. Patent No. 6,499,595. The above claims, 1, 89, 98, 102, 105, 108, 111 are identical to the independent granted claims 1, 28, 42, 79, 80, 82, 83 in U.S. Patent No. 6,699,595, but presented in slightly different form, in general replacing the phrase "removable film" with "cover", an expression used in the original specification at page 12, line 14 in referring to "cover 14", and "sealing surface" with the expression "rim", shown as structure surface 20, e.g. in Figure 2, on which the cover seats in contacting relation.

For convenience to Examiner in reviewing the modifications made to the claim in comparison the granted claim, each of the independent claims is set forth below in marked-up form similar to an amendment to illustrate the changed language (a further technical change was made to the claim corresponding to granted claim 79 to recite better antecedence for the expression "cartridge"):

1. (New): A covered ~~sealed~~ package comprising
a formed plastic container defining a storage region and having a ~~sealing surface~~ defining a rim around an entrance to said region, said container having a bottom wall and at least two opposed side walls each of which has retaining structure integrally formed thereon and protruding inward therefrom, said retaining structure being movable to move outward to permit entry of a cartridge into said storage region and to thereafter move inward to retain said cartridge in said region,
a shaving cartridge contained within said storage region and retained by said retaining structure, said cartridge including a plastic housing and a plurality of blades, and
a removable cover film that is ~~sealed to said sealing surface~~ seated in contacting relation to said rim and covers said entrance.

89. [28] (New): A covered ~~sealed~~ package comprising

a formed plastic container defining a storage region defined by a bottom wall and side walls having side surfaces, and having a ~~sealing~~ surface defining a rim around an entrance to said region,

a stored unit in said storage region, said unit being removable as an entire unit and comprising a shaving cartridge,

retaining structure formed on the inside of said container and extending inward from said side surfaces, said retaining structure retaining said stored unit in a desired position in said container, said retaining structure being movable to move outward to permit entry of said stored unit into said storage region and to thereafter move inward to retain said stored unit in said region, and

a removable cover film that is ~~sealed to said sealing surface~~ seated in contacting relation to said rim and covers said entrance.

98. [42] (New): A covered ~~sealed~~ package comprising

a formed plastic container defining a storage region and having a ~~sealing~~ surface defining a rim around an entrance to said region, said container having a bottom wall and at least two opposed side walls each of which has retaining structure protruding inward therefrom,

a shaving cartridge contained within said storage region and retained by said retaining structure, said cartridge including a plastic housing and a plurality of blades, and

a removable cover film that is ~~sealed to said sealing surface~~ seated in contacting relation to said rim and covers said entrance, wherein said container has a support member on said bottom wall supporting said cartridge in a desired orientation, said retaining structure being located on a said side wall of said container at an elevation higher than said support member.

102. [79] (New): A covered ~~sealed~~ package comprising

a formed plastic container defining a storage region and having a ~~sealing~~ surface defining a rim around an entrance to said region, said container having a bottom wall and at least two opposed side walls each of which has retaining structure integrally formed thereon and

protruding inward therefrom, said side walls being deformable to permit entry and exit of said a cartridge,

a shaving cartridge contained within said storage region and retained by said retaining structure, said cartridge including a plastic housing and a plurality of blades, and a removable cover film that is ~~sealed to said sealing surface~~ seated in contacting relation to said rim and covers said entrance.

105. [80] (New): A covered sealed package comprising

a formed plastic container defining a storage region defined by a bottom wall and side walls having side surfaces, and having a ~~sealing surface~~ defining a rim around an entrance to said region,

a stored unit in said storage region, said unit being removable as an entire unit and comprising a shaving cartridge,

retaining structure formed on the inside of said container and extending inward from said side surfaces, said retaining structure retaining said stored unit in a desired position in said container, said side walls being deformable to permit entry and exit of said stored unit, and

a removable cover film that is ~~sealed to said sealing surface~~ seated in contacting relation to said rim and covers said entrance.

108. [82] (New): A covered sealed package comprising

a formed plastic container defining a storage region and having a ~~sealing surface~~ defining a rim around an entrance to said region, said container having a bottom wall and at least two opposed side walls each of which has retaining structure integrally formed thereon and protruding inward therefrom, said retaining structure snappingly engaging said cartridge,

a shaving cartridge contained within said storage region and retained by said retaining structure, said cartridge including a plastic housing and a plurality of blades, and

a removable cover film that is ~~sealed to said sealing surface~~ seated in contacting relation to said rim and covers said entrance.

111. [83] (New) A covered ~~sealed~~ package comprising

a formed plastic container defining a storage region defined by a bottom wall and side walls having side surfaces, and having a ~~sealing~~ surface defining a rim around an entrance to said region,

a stored unit in said storage region, said unit being removable as an entire unit and comprising a shaving cartridge,

retaining structure formed on the inside of said container and extending inward from said side surfaces, said retaining structure retaining said stored unit in a desired position in said container, said retaining structure snappingly engaging said stored unit, and a removable cover film that is ~~sealed to said sealing surface~~ seated in contacting relation to said rim and covers said entrance.

Enclosed is a \$922.00 check for the excess claims fee. Applicant asks that all claims be examined in view of the amendment to the claims.

Please apply any other charges or credits to deposit account 06-1050.

Respectfully submitted,

Date: Dec 23, 2003
